## Results:

Journal or Magazine = JNL Conference = CNF Standard = STD

### 1 Modeling product and process characteristics in software configuration management

*Schwille, J.;*

Software Maintenance and Reengineering, 1997. EUROMICRO 97., First Euromicro Conference on , 17-19 March 1997

Page(s): 25 -32

[\[Abstract\]](#) [\[PDF Full-Text \(576 KB\)\]](#) **IEEE CNF**

### 2 New product introduction between two geographically dispersed entities

*Classen, A.; Lopez, L.A.;*

Engineering and Technology Management, 1998. Pioneering New Technologies: Management Issues and Challenges in the Third Millennium. IEMC '98 Proceedings International Conference on , 11-13 Oct. 1998

Page(s): 535 -540

[\[Abstract\]](#) [\[PDF Full-Text \(424 KB\)\]](#) **IEEE CNF**

### 3 Towards inverse production life cycle design: a simulation tool linking mass products recycling to environmental legislation and market

*Jovane, F.; Bosani, R.; Castelli, L.; Salsa, F.;*

Environmentally Conscious Design and Inverse Manufacturing, 2001. Proceedings EcoDesign 2001: Second International Symposium on , 11-15 Dec. 2001

Page(s): 924 -928

[\[Abstract\]](#) [\[PDF Full-Text \(519 KB\)\]](#) **IEEE CNF**

### 1 Grapevine: an exercise in distributed computing 2%

 Andrew D. Birrell , Roy Levin , Michael D. Schroeder , Roger M. Needham  
**Communications of the ACM** April 1982

Volume 25 Issue 4

Grapevine is a multicomputer system on the Xerox research internet. It provides facilities for the delivery of digital messages such as computer mail; for naming people, machines, and services; for authenticating people and machines; and for locating services on the internet. This paper has two goals: to describe the system itself and to serve as a case study of a real application of distributed computing. Part I describes the set of services provided by Grapevine and how its data and funct ...

### 2 Reasoning about code mobility with mobile UNITY 1%

 Gian Pietro Picco , Gruia-Catalin Roman , Peter J. McCann  
**ACM Transactions on Software Engineering and Methodology (TOSEM)** July 2001

Volume 10 Issue 3

Advancements in network technology have led to the emergence of new computing paradigms that challenge established programming practices by employing weak forms of consistency and dynamic forms of binding. Code mobility, for instance, allows for invocation-time binding between a code fragment and the location where it executes. Similarly, mobile computing allows hosts (and the software they execute) to alter their physical location. Despite apparent similarities, the two paradigms are disti ...

### 3 Authentication in office system internetworks 0%

 Jay E. Israel , Theodore A. Linden  
**ACM Transactions on Information Systems (TOIS)** July 1983

Volume 1 Issue 3

**4** Information Systems in Perspective

0%

J. D. Aron

**ACM Computing Surveys (CSUR)** December 1969

Volume 1 Issue 4
